Resident of Kimberly (Center Street)

Idaho Sand and Gravel would like to apologize for the inconvenience the construction activities will have in the coming days. We ask that you please work with us and allow Idaho Sand and Gravel to conduct our construction activities and get your road completed.

The schedule for the completion of the project is mid June. However, by May 7, 2010 we will have a majority of the mass excavation and import of sand and gravel complete allowing local traffic to access driveways. In the meantime we will be conducting the excavation and the driveways will be impassable.

Regarding garbage pickup if you could take dumpsters to the nearest side street (Ash, Birch, and Chestnut) for pickup allowing for normal pickup on Mondays and Wednesdays.

Again thanks for your cooperation and patience allowing Idaho Sand and Gravel to complete Center Street providing the Kimberly Residents a nice functional new road.

Thanks

Idaho Sand and Gravel Company
